The term "User" refers to the person accessing this website with responsibility for accepting the Company's terms and conditions, or an authorized User with delegated responsibility to use the website for your company's benefit. All terms refer to the offer, acceptance and consideration of payment necessary to undertake the process of our assistance to the Client in the most appropriate manner, whether by formal meetings of a fixed duration, or any other means, for the express purpose of meeting the Client's needs in respect of provision of the Company's stated services, in accordance with and subject to, prevailing US Law. Purpose

The purpose of our Engine Polygraph (EP) website, www.enginepolygraph.com, is to provide a data storage and retrieval site "in the cloud" to contain information about our clients' customer engines in use. These data are from SenX FirstLook® sensors (www.senxtech.com) of an engine on a given date providing 'signatures' of the engine pulses in the exhaust, oil dipstick tube, and other specific engine locations providing periodic signals from which we assess the engine's "physical integrity". If the engine has a problem, these signatures can be very valuable in diagnosing the problem. In addition, by viewing the changes in the signatures over time, it is possible to see certain problems 'grow'.

The service provided by Predictive Fleet Technologies, Inc. is in return for a monthly subscription fee that is payable according to the terms of the specific subscription plan desired by you, the customer. This method for storing signatures is designed to provide a seamless integration for your fleet operation customers to Engine Angel, another Predictive Fleet Technologies application that might provide additional value to you and your customers.

In addition, users may request certain types of signatures be analyzed by Engine Angel software and a report, an Engine Assessment that is delivered to a specified email address. Each Assessment is provided for an additional charge unless the owner of the vehicle has an Engine Angel subscription. In addition, the PDF Assessment report is stored in the Engine Polygraph database for later referral on an 'on-demand' basis.

Use

It is expected that you, the customer, will use the Engine Polygraph as described in the section, Purpose, above. Additional documentation on how to get value by using the Engine Polygraph is contained in the Engine Polygraph User's Guide, available from the web-site. You must not reverse engineer the application nor violate our copyrights.
